

KETRON EVENT PRO1 PACKAGE INSTALLATION INSTRUCTIONS

Congratulations on your purchase of the KETRON EVENT PRO1 package. Depending on which package you got, the installation procedure will be slightly different and so make sure you go through this document thoroughly to carry out the proper installation sequence(s) for your package. ***We also strongly advise you update your equipment to OS 3.0.0 or higher BEFORE installing this package.***

INSTALLATION STEPS

1. Make sure you have the most recent KETRON Operating System installed in your EVENT (from www.Ketron.it) and you have cleared/formatted the SAMPLER (Menu – Audio/Sampler – Sampler – Utilities – Format)
2. Insert an empty/clean USB Drive (*preferably no greater than 32GB*) into your computer (*make sure this drive can be read by the EVENT instrument – you may want to test before inserting into your computer*).
3. Download the zipped file **AJAM-PRO1-PACK.rar** sent to you via email onto your desktop (*not the USB drive*).
4. Once downloaded, unzip this **AJAM-PRO1-PACK.rar** zipped file's contents into the USB drive. If prompted for a password to unzip the file, use your serial number. Depending on the package you purchased, you should have the following files and main folders in your new USB drive once the unzipping is completed (*this example is for the ELITE Pro1 pack*):
 - a. AJAM-STYLES1-xxxxxxxxxxx.ENC (*System File where xx = your instrument's serial number*)
 - b. AJAM-SOUND-1A-xxxxxxxxxxx.ENC (*System File where xx = your instrument's serial number*)
 - c. AJAM-SOUND-1B-xxxxxxxxxxx.ENC (*System File where xx = your instrument's serial number*)
 - d. AJAM-CONTENT-xxxxxxxxxxx.ENC (*Only if you got the CONTENT package. System File where xx = your instrument's serial number*)
 - e. INSTRUMENT (Folder)
 - f. MULTITRACK SURROUND (Folder)
 - g. MIDIFILES (Folder)
 - h. USER_VOICE (Folder)
 - i. AjamSonic_Final_300.jpg (file)
 - j. INSTALLATION INSTRUCTIONS.pdf (file)
 - k. Remove the USB drive from your computer and insert into the first USB slot on the EVENT instrument (*slot next to the USB host connector*), and wait about 5 seconds for the EVENT to 'recognize' it.

5. Copy all these files and folders except the “**AJAM-STYLES1-xxxxxxxxxxxxx.ENC**” and the “**AJAM-SOUND-1A-xxxxxxxxxxxxx.ENC, and AJAM-SOUND-1B-xxxxxxxxxxxxx.ENC**” files from the USB drive into the root folder of your EVENT’s SSD drive (USBACK) (*not into any folders or subfolders*) as follows:
 - a. Press the **MEDIA** button to display both the internal drive (USBACK), and USB drive.
 - b. Touch the DISK EDIT icon on the screen – then touch the USB drive to display the content you want to copy from.
 - c. Using your finger tips, touch the folder icon to the left of the folder names to select/highlight the folders (INSTRUMENT, MIDIFILES, MULTITRACK SURROUND and USER_VOICE), then touch the files AjamSonic_Final_300.jpg. As you select them, they are highlighted with a grey line. **DO NOT TOUCH** THE “AJAM-STYLES1-xxxxxxxxxxxxx.ENC or the AJAM-SOUND-1a-xxxxxxxxxxxxx.ENC, or AJAM-SOUND-1bxxxxxxxxxxxxx.ENC” files!
 - d. Touch COPY below the screen and OK the next message to select where to copy the selected files to.
 - e. The screen will once more display both drives.
 - f. Touch the KETRON drive (USBACK) to display the current contents of the EVENT instrument.
 - g. Touch the PASTE icon below the screen to start the copying process. This will take some time.
 - h. **NB:- You can also achieve a quicker result by connecting the EVENT to your computer via a USB printer cable, pressing MEDIA and touching PC CONNECT to establish a connection between the internal SSD drive of EVENT and your computer, and dragging the relevant files into the internal SSD drive of the EVENT.**
6. When the COPY procedure is complete, press the **MEDIA** button to get the EVENT out of the MEDIA mode and back to normal operation.
7. If you had connected the EVENT to your computer via USB cable, touch PC connect to disconnect the EVENT’s SSD from your computer, then physically remove the USB cable and install the USB drive for the next step.
8. These next steps will depend on which package you purchased:
 - a. **If you purchased the ELITE and SOUND & STYLE PRO1 PACK, proceed as follows** to install the styles and their style elements: With the USB drive still connected to the EVENT #1 USB port on the side,
 - i. Press the **MEDIA** button to access the media screen (*if not already there from completing the above procedure*).
 - ii. Touch the USB drive icon on the screen to display all the contents of the USB drive which you unzipped from above.

- iii. Depending on how your File display is set up under (SETTINGS – FILE VIEW), the files may be displayed before the folders or the folders maybe displayed before the files
- iv. Turn the wheel to scroll through the folders and files until you see the file **AJAM-STYLE1-xxxxxxxxxx.ENC** (*where the last 10 digits are your serial number you provided us*).
- v. Touch the file **AJAM-STYLE1-xxxxxxxxxx.ENC** twice, *or highlight it*, then press the **ENTER** button to start loading the relevant files and software. Installation should be quick and you will get a confirmation message once done.
- vi. Now, turn the wheel to scroll through the folders and files until you see the file **AJAM-SOUND-1A-xxxxxxxxxx.ENC** (*where the last 10 digits are your serial number you provided us*).
- vii. Touch the file **AJAM-SOUND-1A-xxxxxxxxxx.ENC** twice, *or highlight it*, then press the **ENTER** button to start loading the relevant files and software. This could take up to 15 minutes to be installed before you get the confirmation message on the screen.
- viii. Now, turn the wheel to scroll through the folders and files until you see the file **AJAM-SOUND-1B-xxxxxxxxxx.ENC** (*where the last 10 digits are your serial number you provided us*).
- ix. Touch the file **AJAM-SOUND-1B-xxxxxxxxxx.ENC** twice, *or highlight it*, then press the **ENTER** button to start loading the relevant files and software. This could take up to 15 minutes to be installed before you get the confirmation message on the screen.
- x. **LOAD THE NEW DATA TABLE:** Press and hold down the Arranger buttons “A” & “B” – then while keeping them down, press the **ENTER** button to update the **MODELLING TABLE**. A brief message will be displayed showing this update.
- xi. **LOAD THE NEW SAMPLES:** You need to now manually load the rest of the new samplers into the SAMPLER that will be used by existing factory sound and new user sounds. (*These new samples will replace any samples you had previously loaded into the SAMPLER. You can of course build a new sound bank [sbk] library (if there is more space available) of both your samples and ours!*)
 1. Press the **MEDIA** button to get out of the MEDIA mode (*after the above Styles and Sounds installation process*).
 2. Press the **MENU** button & touch AUDIO/SAMPLER.
 3. Touch **SAMPLER** to access the SAMPLER.
 4. Touch the **UTILS** icon on the screen (*Utilities*)

5. Touch **LOAD SB3** on the screen to display the list of current Sound libraries you have.
6. Touch the **1-AJAM-PRO1-OS3-UPDATE** file on the screen to start loading the new samples (*only if you have OS3.0.0 or higher installed*). If you have an older **OS 2.x.x**, then touch the file "**2-AJAM-PRO1-OS2-OLD**". This will take approximately 20 minutes.
7. Once the samples have completely loaded, press **EXIT** repeatedly 3 times or **MENU** to get out of the sampler.
8. Turn off the EVENT and wait about 10 seconds before turning it back on.
9. You can now start to enjoy the new:
 - a. **Styles** (USER STYLE/Unplugged)
 - b. **Sounds** (User Sounds/Voice Category)
 - c. **Real Bass and Chords** found in **VIEW & MODELLING** –
 - i. BASS – REAL BASS – USER
 - ii. CHORD – REAL CHORD - USER. Turn the wheel or use the <<PAGE>> icons to display even more to select from.
 - iii. Multi Chord – CHORD – Chord 1-5 – Multi Chord & User
 - iv. Multi Bass – BASS – Midi Bass
 - d. **MultiTracks** (**ELITE ONLY**) – Player 1 – MultiTrack (*Use Style, Drum, Bass, Chord and Real Chord volume sliders to adjust the individual volumes of the individual stems/tracks of the song*).
 - e. **Midifiles with Text** (**ELITE ONLY**) – Player 1 – Midifiles – Folder of choice – Song to play. Use the sliders (STYLE – LOWER) to adjust the volumes of the tracks of the midifile
- b. **If you purchased the CONTENT PRO1 PACK, proceed as follows:**
 - i. With the USB drive still connected to the EVENT #1 USB port on the side,
 - ii. Press the **MEDIA** button to access the media screen (*if not already there from completing the above procedure*).
 - iii. Touch the USB drive icon on the screen to display all the contents of the USB drive which you unzipped from above.
 - iv. Depending on how your File display is set up under (SETTINGS – FILE VIEW), the files may be displayed before the folders or the folders maybe displayed before the files

- v. Turn the wheel to scroll through the folders and files until you see the file **AJAM-CONTENT1-xxxxxxxxxx.ENC** (*where xxx = the last 10 digits are your serial number you provided us*).
- vi. Touch the file **AJAM-CONTENT-1A-xxxxxxxxxx.ENC** twice, *or highlight it*, then press the **ENTER** button to start loading the relevant files and software. Installation is about 20 minutes and you will get a confirmation message once done.
- vii. Touch the file **AJAM-CONTENT-1B-xxxxxxxxxx.ENC** twice, *or highlight it*, then press the **ENTER** button to start loading the relevant files and software. Installation is about 20 minutes and you will get a confirmation message once done.

You will need to now load the new Modeling table before you can access and use the new Real Bass and Real Chords, so proceed as follows:

- viii. Press and hold down Arranger buttons **A & B** – then while keeping them down, press the **ENTER** button to update the ‘MODELLING TABLE’. A brief message will be displayed showing this update.
- ix. Once done, you can now start playing and using the new Live/Real Bass and Live/Real Chords found in **VIEW & MODELLING** –
 1. BASS – REAL BASS – USER
 2. CHORD – REAL CHORD - USER. Turn the wheel or use the <<PAGE>> icons to display even more to select from.

PACKAGE CONTENTS

PRO1 Pack – Elite: For the customer who wants *EVERYTHING* in the Pro1 package. This package is for those who play live with styles and also use backing tracks as part of their performances or when taking a break (*as a DJ*). This package also includes the overall balancing of ALL styles and sounds on the instrument so volumes are similar. It comes complete with:

- 66 Styles
- 66 Sounds
- 46 Real Chords
- Multi Chords
- Multi Bass

- *6 Real Bass*
- *20 Multi tracks Surround*
- *2000 + Professional Midifiles & Karaoke with Tune1000*

PRO1 Pack – Styles & Sounds: For the customers who only want new styles and sounds. This package is predominantly for those who play live with styles and look forward to expanding their current styles library. It includes:

- *66 Styles*
- *66 Sounds*
- *46 Real Chords*
- *6 Real Bass*

PRO1 Pack – Content: For the customers who only want content and material to add to their existing factory or user styles library. This is for those who are satisfied with the existing factory styles or create their own styles, but would like to spice either one with our content. This includes:

- *46 Real Chords*
- *6 Real bass*
